

QHawk: AI-Powered Queue Management for QSRs

Turn waiting time into profit with QHawk's AI-powered computer vision platform. Designed specifically for QSRs and retailers to optimize operations, reduce queues, and grow revenue.

 **by Espresso Consulting**

The Hidden Cost of Waiting

Long Queues

Visible long lines deter customers before they even enter.

Long Queuing Times

Excessive wait times cause customer abandonment.

Long Collection Times

Delays after ordering sour the customer experience, reducing repeat business.

How QHawk Solves These Problems

Monitor

QHawk counts every customer queuing and moving through your store.

Measure

Tracks how long each customer waits from arrival to order.

Analyze

Measures the time from order to collection.

Alert

Sends instant notifications when queues grow or service slows.

Key Features

Real-Time Camera Insights

Live view of store
operations
anytime, anywhere.

Customer Counting

Track customers
accurately in
queues and across
store areas.

Queuing Time Measurement

Measure how long
customers spend
waiting in line.

Real-Time Dashboard

View all key
metrics on an
intuitive,
customizable
dashboard.
